

Warranty and Maintenance

Kanteros works in an extremely efficient manner. We believe our work is a unique piece of art as many others in the history of art and therefore, we try to maintain its qualities and features to extend its beauty for a long period of time.

We invite you to pursue some basic recommendations for maintenance:

For the maintenance of different stuccos, both wall covering and furniture, we highly recommend the use of a damp cloth or, if necessary, a soapy neutral solution. Please, note these materials may reflect architectural tensions due to its attributes.

For metal maintenance we recommend the use of a damp cloth without alcohol or any other solvents.

As a general rule, we strongly advise you to keep them away from corrosives and sharp elements to avoid any major damage.
